

FUNGICIDAL TREATMENT

PRODUCT DATA SHEET

FUNGICIDAL TREATMENT is an aqueous solution of low toxicity fungicides and algicides with a broad spectrum of activity against fungus and algae.

USAGE

- For the treatment of new concrete surfaces against fungus and algae prior to application of paint systems.
- For the treatment of soiled surfaces which have cleaned and sterilised prior to application of paint systems.

PHYSICAL DATA

- **Product Code :** 9601
- **Colour :** Milky liquid
- **Specific Gravity :** 1.00 approximately
- **Flash Point :** > 23° C Closed cup
- **Shelf Life :** 12 months
- **Packing :** 1 L, 2 L, 5 L, 20 L.

APPLICATION

- **Application method :** Apply **FUNGICIDAL TREATMENT** on clear, dry surface by brush. Allow to dry over night before applying paint system.

NOTE : If rain falls within 1 hour after application of **FUNGICIDAL TREATMENT** it is advisable to repeat the operation.

- **Spreading rate :** Will vary and depend largely on porosity of the substrate. An average spreading rate is 10 m²/ litre.
- **Cleaning solvent :** Fresh water.

SAFETY

- **FUNGICIDAL TREATMENT** is a hazardous material and should be used with caution.
- Wear adequate protective equipment during application, remove splashes from skin with soap and water. In case of contact with eyes, rinse with ample water and seek medical advice if necessary.
- Ensure good ventilation during application and drying.
- Keep containers tightly closed and away from children.
- A complete Material Safety Data Sheet is available on request.

These recommendations are meant as a guide, no guarantee is implied since conditions of use, method of application and cleanliness of the substrate prior to painting are beyond our control.
