

# FUNGICIDAL WASH

## PRODUCT DATA SHEET

**FUNGICIDAL WASH** is an aqueous solution of low toxicity bactericides and a bleaching agent.

### USAGE

- For cleaning and sterilising surfaces attacked by fungi and algae.

**Note :** **FUNGICIDAL WASH** contains a bleaching agent for removing soiling caused by fungi. It should not be used in concentrated form when used for sterilising pigmented coatings, because of the risk of discoloration.

### PHYSICAL DATA

- **Product Code :** 9600
- **Colour :** Clear liquid
- **Specific Gravity :** 1.03 approximately
- **Flash Point :** > 23° C Closed cup
- **Shelf Life :** 12 months
- **Packing :** 1 L, 2 L, 5 L, 20 L.

### APPLICATION

- **Application method :** Add 1 part of **FUNGICIDAL WASH** to 4 parts fresh water and apply with a brush or manual sprayer over soiled surface. Scrub surface with a stiff brush to remove spores of fungus, algae and contaminated paint. Wash and clean with fresh water.  
Alternatively wash and clean under high pressure with a mix of 1 part of **FUNGICIDAL WASH** and 9 parts of fresh water. Allow to react for about 10 minutes and clean with fresh water.
- **Consumption :** Will depend on degree of soiling. For cleaning soiled surfaces, an average would be 15 m<sup>2</sup>/ litre and for sterilising purposes 25 m<sup>2</sup>/ litre.
- **Cleaning solvent :** Water.

### SAFETY

- **FUNGICIDAL WASH** is a hazardous material and should be used with caution.
- Wear adequate protective equipment during application, remove splashes from skin with soap and water. In case of contact with eyes, rinse with ample water and seek medical advice if necessary.
- Ensure good ventilation during application and drying.
- Keep containers tightly closed and away from children.
- A complete Material Safety Data Sheet is available on request.

These recommendations are meant as a guide, no guarantee is implied since conditions of use, method of application and cleanliness of the substrate prior to painting are beyond our control.
